Nutrition Security – A Conceptual Framework

A4NH results framework

Improved nutritional status STUNTING MICRONUTRIENTS

Improved health status DALYs CGIAR Strategic Goals

Improved diet quality (food consumption; diet diversity) Empowerment of women and poor communities

Better cross-sector policies, programs and investments Reduced exposure to causes of agric. associated diseases

IDOs

Value Chains

Programs

Policies

A4NH Impact Pathways

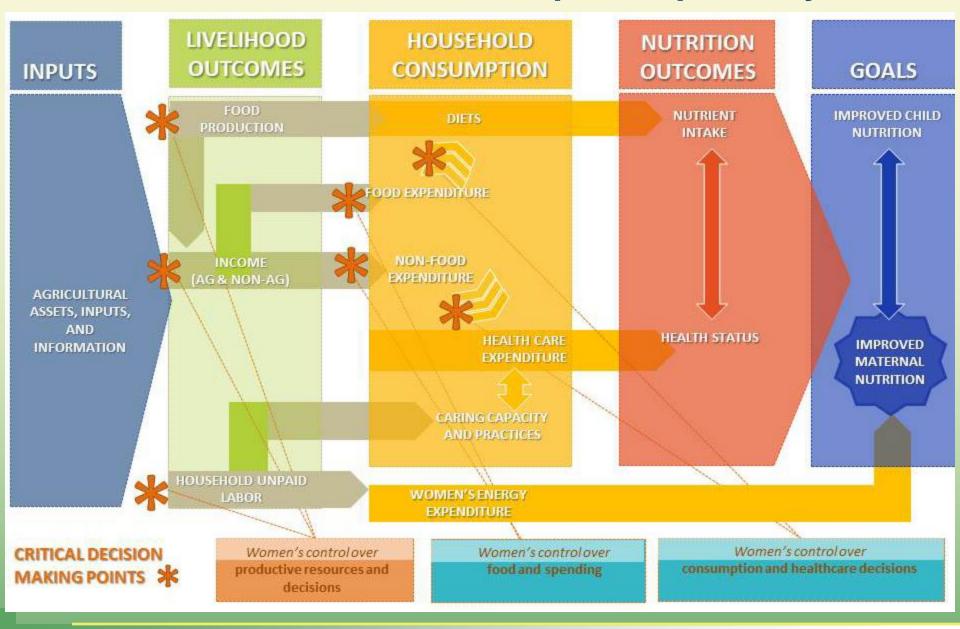

Biofortification

Value chains for enhanced nutrition Integrated programs and policies

Agricultural disease risk

A4NH Research Portfolio

Nutrition-sensitive development pathways

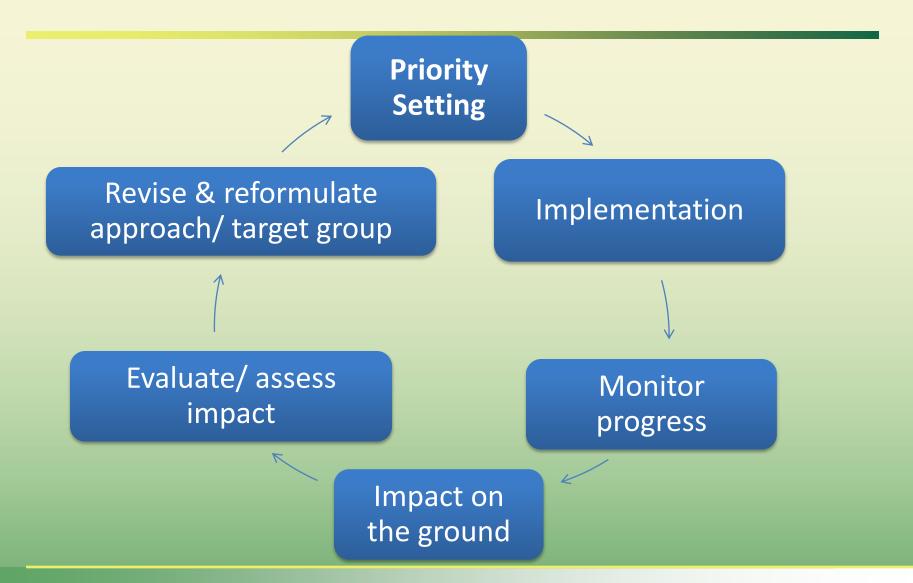

Capacity Development Strategy

- Current set of capacity development activities
- What capacities are needed for the successful integration of nutrition in Agriculture programs
- What need based training and learning activities need to be developed for sustainability
- Scaling up the adoption and adaptation of intervention
- Looking Ahead in next five to ten years

Capacity Development for What?

- Identifying problems, developing contextual solutions, implement interventions, monitor and evaluate the programs, refine the programs and policies
- Institutional development and organizational needs for adoption of nutrition knowledge in programming
- Policy analysis and research capacity for developing enabling environment for integration of nutrition in agriculture research and extension

Capacity Development Cycle

Capacity Assessment for Nutrition Education

- Institutional mapping of existing capacity
- Identify capacity gaps
- Ex-ante analysis of benefits and costs of capacity
- Guidance on where to invest and how?
- Set up a monitoring and evaluation system to track capacity development
- Assess impact of capacity development
- Learning for Change

Some Next Steps for Discussion

- Needs assessment at the national level with specific contextual needs and opportunities
- Identify short, medium, and long run strategic activities –
 State extension systems, centrally sponsored schemes, and national nutrition interventions outside agriculture
- Strategic interventions at all levels research, education extension and outreach
- Intervention through filling the needs of public, private and NGO sectors.
